ABOUT ME

I'm a final-year Software Engineering student at the University of Malaya, passionate about building practical and efficient software solutions. Skilled in Java, Python, and JavaScript, with experience in full-stack development, cloud tools, and collaborative projects. Currently seeking internship or entry-level roles to apply my skills, grow professionally, and contribute to meaningful tech solutions.

TECHNICAL SKILLS

LANGUAGES:

Java, Python(Pandas, Matplotlib, Plotly), HTML, CSS, JavaScript, SQL.

TECHNOLOGIES:

Git, GitHub, Streamlit, Firebase, REST APIs

TOOLS:

VS Code, Android Studio, Netbeans, Google Colab, Jupyter Notebook, Figma, Canva, LucidChart, Drawio

RELEVANT COURSES

Object-Oriented Programming, Mobile Application Development, Data Structures, Algorithms, Machine Learning, Python For Scientific Programming, Network Technology Foundation, Databases, Software Modeling

Networking fundamentals, IP addressing, Ethernet concepts, and outer/switch configuration using Cisco Packet Tracer.

Adobe Photoshop, Illustrator, and InDesign

SPOKEN LANGUAGES

ENGLISH

HOBBIES

NATURE & PAINTING

SUMMARY

Motivated and detail-oriented final-year Software Engineering student at the University of Malaya, with a strong foundation in programming, software design, and teamwork. Eager to contribute to real-world projects and continuously improve through hands-on experience.

PROJECT EXPERIENCE

MOBILE APPLICATION DEVELOPMENT

Java, Android Studio
Feb 2025

- Developed a smart farming mobile application addressing
- SDG 2: Zero Hunger, designed to assist farmers.
- Integrated modules : weather updates, soil health analysis, pest detection, AI Chatbot and community interaction.
- Implemented an **AI-powered chatbot** using JAM AI and Retrofit to provide personalized planting advice based on environmental conditions.

Pokémon-INSPIRED BATTLE GAME

Java
Jul 2024

- Designed and developed a **turn-based Pokémon-style game** in Java featuring battle mechanics, character stats, and evolution logic.
- Applied **object-oriented programming principles** such as inheritance, encapsulation, and polymorphism
- to model creatures, moves, and battle systems.

MEMECOIN DASHBOARD

Python, Streamlit, Pandas, Plotly
Jul 2024

- Built an interactive **MemeCoin Dashboard** using **Python**, **Streamlit**, featuring real-time memecoin data, sentiment analysis, and visualizations with **Plotly**.
- Integrated dynamic charts and data visualizations using **Plotly** and **Streamlit** to display price trends, trading volume, and market depth.

EDUCATION

UNIVERSITY MALAYA
Kuala Lumpur
PERSUING

Bachelor s in Computer Science
Software Engineering Sep 2023 - Present
CGPA 8.71/10

DELHI PUBLIC
SCHOOL
Srinagar
2023

Higher Secondary School
Central Board of Secondary Education
Oct 2021 - Nov 2023
CGPA 8.6/10

CERTIFICATIONS

CCNAv7: Introduction to Networks
Cisco Networking Academy
