EDUCATION

Universiti Malaya

Oct 2023 - March 2027

Bachelor in Computer Science (Software Engineering) | CGPA : 3.66/4.00

Relevant Courses: Object-Oriented Programming, Mobile Application Development, Data Structures and Algorithms, Machine Learning, Python For Scientific Programming, Network Technology Foundation, Databases, Software Modeling, Software Architecture and Design Paradigms.

Honors: Dean's List

TECHNICAL SKILLS

Languages: Java, Python(Pandas, Matplotlib, Plotly), HTML, CSS, JavaScript, React.js, Node.js, React Native, Django REST Framework, SQL, PostgreSQL

Technologies: Git, GitHub, Streamlit, Firebase, Supabase, REST APIs

Tools: VS Code, Android Studio, Docker, SpringBoot, Netbeans, Google Colab, Jupyter Notebook, Figma, Drawio

EXPERIENCE

Sapu (Ride-Hailing Platform) | Software Engineer

Nov. 2025 - Present

- Revamped and optimized the React.js frontend, improving UI/UX and overall application performance
- Developed key features including Driver Dashboard enhancements, Driver Negotiation, and Live Order Tracking modules
- Migrating and enhancing location management features within the Django admin backend
- Identified and fixed bugs, ensuring system stability and smooth user experience
- Collaborating with a cross-functional team to maintain and extend a Django-based backend serving 10K+ users and 1.5K+ daily orders

PROJECTS

Fuelnomic | React Native, Supabase

Jan. 2026

- Built a mobile app to track RON95 fuel subsidies in Malaysia, featuring real-time consumption visualization, vehicle health analysis, and predictive analytics for fuel management.

Mobile Application Development Project | Java, Android Studio

Feb. 2025

- Developed a smart farming app supporting SDG 2 with integrated weather, soil analysis, pest detection, and an AI chatbot delivering personalized planting advice.

Pokémon-Inspired Battle Game | Java

July. 2024

- Designed a turn-based battle game applying object-oriented principles to implement character systems, combat mechanics, and evolution logic.

CERTIFICATES

CCNAv7: Introduction to Networks

March 2024 - June 2024

Cisco Networking Academy

- Covered networking fundamentals, IP addressing, Ethernet concepts, and router/switch configuration using Cisco Packet Tracer.

Udemy

Dec 2021 - Feb 2022

Graphic Design

- Learned Adobe Photoshop, Illustrator, and InDesign
- Applied design theory to create personal branding and promotional projects
